# NATIONAL CYCLE SHOW

New York's Fifth Annual Bicycle show opens to-night in Madison Square Garden, with the usual glare of elec tric lights, whirl of wheels and crowds of spectators, decorated with pins, buttons, buttonnieres and ribboned banlibraries of catalogues, booklets and

dinary from the character of its exhibits. Some of the features are very novel. In places the Garden has the appearance of an industrial exhibit. designed to educate the public in the out avail. detail of bicycle construction. Such a the very is one is the gear-cutting machine shown operation by the Pope Manufacturing Company. The stand of this company is immediately opposite the door by which one enters. The main part of exhibit is an immense gear-cutting machine, engaged in cutting out the bevel gears used in the construction of the chainless bicycle. The 'machine, with a number of workmen in charge, goes through the complete process. Col. A. A. Pope believes that this is the best means of demonstrating the pertection to which the manufacture of bevel gears has been brought. are many other exhibits of a nature similar to this, but not quite so extensive. A number of bicycles are shown in the process of construction, and parts are there in every stage of de-velopment, from the rough casting to the finished parts.

### BOXING.

Oscar Gardner's defi to Jack McClelland in Thursday's Intelligencer was "called" by McClelland's manager, Billy Corcoran, according to yesterday's Pittsburgh papers, and he is reported with having deposited \$100 with the Pittsburgh Times, to bind a match with Gardner two weeks after signing with Gardner two weeks after signing articles. Oscar is under the impression that Corcoran wants the match before a club, which is out of the question, as he said before, since he is under contract not to engage in any public contest until after his battle with McGovern, following which he will be only too glad to accommodate McClelland for as much money as desired. It would be impossible for him to fight the form of the match of the said of the just now, in private or public, owing to the fresh injury to his right hand, which hadn't fully healed from his last encounters. He is determined to ac-commodate McClelland just as soon as

"The Bowery After Dark," is the title "The Bowery After Dark," is the title of a melodrama to be given at the Grand Opera House for a three night engagement, beginning February 1, in which Oscar Gardner is interested, and he will appear with the show while its in this city. His manager, Paddy Sullivan, is the proprietor, and one of the principal characters is essayed by Chuck Conners, famous as the "King of the Bowery."

As the notice was too short, Kid Goulette stated that he couldn't make 128 pounds for his match here next Thursday night, with Eddie Gardner, consequently they will meet at catch-weights. Eddie was opposed to this feature, but finally consented. At that he is likely to beat Goulette.

Jimmy O'Leary failed to show up yesterday, to cover Walter Burgo's for-feit money, so it was pulled down, and all prospects of a match between them have gone glimmering.

# CHECKERS.

The first series of the match at checkors between William Detweller, of the South Wheeling club, and Frank Pine, of the Young Men's Club team, of Itellaire, was played last night at the latter club's quarters, and resulted in a decisive victory for Pine, who won seven games and drew one, Detweller winning none. The return series will be played at the South Wheeling club's quarters next Saturday evening.

Another match has been arranged be-tween the Bellaire and Martin's Ferry clubs. The first series will be contest-ed Saturday evening, January 27, at Bellaire.

Interest in the Musee handicap con-tinues unabated, and some fine scores are being made daily. McCollough, of the Brownies, broke the high score Thursday by getting 220, which, with his handleap of twenty-eight pins, made a total of 248. This, however,

was beaten later in the evening by Clark Hanes, of the Daister, who rolled 244, and with a handleap of twenty-six pins makes a total of 270, which is pretty hard to beat. This will, however, in all probabality, be beaten fo-night, when the boys get their last chance, as some of them have handicaps of nearly

Another attempt, or rather a series of them, was made by Fred Sliptner yeaterday morning at the lock-up, to end his career. He tried to hans himself by making a noose of part of his underwear, which he fastened to the cell bars. A hobo interfered. About an hour later, he wrapped part of the clothing about his neck, and selzing the ends with both hands, he pulled them as tight as he could. When discovered, ends with both hands, he pulled then as tight as he could. When discovered he was nearly dead from this method o self-strangulation. Dr. Alley was summoned and after considerable effort he brought young Sliptner around al right. Later the young man was removed to his home. He is suffering from delirium tremens, but has probably passed the worst stage.

Robbers are still very bold in their raids in this city. Some time Thursday night they entered the stores of Heatherington & Archer, and A. Kern. The family of the latter sleept over the store, that being their residence, but they knew nothing of the roberry until yesterday morning. The thieves entered from the rear and from Heatherington & Archer's they took about \$80 worth of hats, clothing and neckties. From the other store they took very little except the cash register. That they took out into the alley and broke to pieces, perhaps because there was no cash in it. This robbery was committed in one of the most prominent places in town, in a place where the officer of that district might see the operations, if going on while he was in that locality. But the theyes evidently suited their time to a period when they knew he was not in that vicinity. At any rate there is no positive clue, but a suspicion as to the perpetrators. The electric lights were off in that part of town part of the night.

Coughs, Colds, Asthma and Croup Cannot Exist Where It is Used

The two illustrations above show more plainly than words can express the wonderful change that has been made in the treatment of respiratory diseases during the past two years. Formerly, any sufferer from Catarrin, asthma, Consumption or Bronchitis was at once placed under the care of some physician and dosed with all sorts of nauseating drugs and tonics. Even as far back as twenty-five years ago, the doctor seemed to be aware of the fact that in order to reach these diseases inhalation must be used, and experimented with atomizers, sprays and douches, in the hope of finding some germicide which could be forced into the bronchial tubes and lungs. That all these treatments proved practically useless is shown by the fact that, during the past tweny years the number of deaths from catarrh and consumption alone, has increased from \$000 to over 70,000 a year. The discovery that these terrible scourges were germ diseases fild not lessen the death rate, for of antifer germicides known to the profession but one of them could be inhaled into the lungs, and this, Chiorine Gas, was deadly poison. The others, carbolic acid, ammonia and creasote (liquids) must touch the germs themselves in order to destroy; consequently, could not be used with effect, as it is absolutely impossible for moisture in any form to enter the bronchial tubes and lungs. The discovery of
